Can you remind me again how to access the site viewer? Thank you.

Paula,

The ODFs are small enough to email. I'm not sure if the data we have covers the area that you are thinking about for Mineral Creek. You can use the site viewer to determine data coverage.

John – How do I get these to my contractor – not sure if the files are too big for sending thru the email. Also do we have the Mineral Creek portion of the site mapped in GIS?

Paula,

See below for the newest maps that ESAT completed. Liz is working on reviewing them and posting to the superfund website.

Hello John, Dan, and Liz

I have updated and finalized the Upper Animas figures with the most current Latitude and Longitude for sample locations taken in the field. Please review when you have time and get back to me with any questions. You can find the figures at the following location:
